Mercedes Benz, Stevenage

Mercedes Benz are at the very forefront in providing luxury vehicles for their customers.

They are renowned for their style and performance across the automotive industry and their cars are in high demand for both business and commercial customers. Because of their popularity, it can be a struggle to accommodate both display vehicles and stock at their showroom sites.

Their Stevenage showroom faced this very same issue and needed a solution that would prevent them from having to acquire more land or relocating. We supplied our TopDeck solution to enable more car park spaces and capacity without the need for additional space. Every TopDeck project we complete is custom designed and made to accommodate our client's needs. We designed, manufactured and installed all of the primary and secondary steelwork on this project to erect the TopDeck car park.

Specification

- Structural steel columns
- Armco barrier rail
- Vehicle restraint system
- RB1 Posts
- Flexi-panel
- Pedestrian handrail and mesh
