07 WAREHOUSE RAIL

Our Warehouse Rail is a newly advanced rail with the appearance of a standard A Rail. However, it is much more lightweight and of a much smaller profile, suitable for warehouse type environments.

WAREHOUSES | MSCP COLUMN PROTECTION | SERVICE YARDS | LOADING BAYS | AVIATION AREAS

01

BESPOKE SIZES

We can manufacture Warehouse Rail in a variety of shapes and sizes to suit, including single, double and even triple height options.

02

QUICK TO INSTALL

By using the RB1 posts within the system design there are typically only 4 anchors to fix into the ground per column protection unit.

03

ADDITIONAL PRODUCTS

Can be used in a column mounted option to avoid drilling into slabs. Also available with mesh infills.

CONSISTENT PROTECTION

The Warehouse Rail Column Protection Unit is made up of our RB1 Spring Steel Buffers & Warehouse Rail Semi Circles and is supplied as a nudge protection unit.

The warehouse rail system can be used as an additional barrier to most of our systems as a low level double height barrier

BENEFITS OF THE WAREHOUSE RAIL

- IDEAL FOR LAMP POST PROTECTION
- AVAILABLE IN FULL CIRCLE, AND SEMI CIRCLE UNITS
- COLUMN MOUNTED SOLUTION
- REDUCES THE RISK OF STRUCTURAL DAMAGE TO EXISTING COLUMNS
- LOW LEVEL FORKLIFT PROTECTION
