East Marketgait, Dundee

Our innovative Brisafe Wire Rope safety barrier has been installed at the new, 500 space East Marketgait car park in Dundee.

The multi-storey car park serves the new leisure centre which is part of Dundee City Council's multi-million pound redevelopment of the city's waterfront area. The car park, incorporating a retail unit, is linked to the leisure centre by a unit central foyer and the complete facility boasts a competition sized swimming pool, health suite, café and flumes.

Our safety barriers were specified throughout the car park including their column mounted Brisafe perimeter barrier which meets BS EN 1991-1-1 standards. With a zero footprint in the parking bay, Brisafe allows architects to maximise the parking space available, while providing a flexible system that 'gives' on impact to minimise damage to vehicles and the barrier itself.

It creates a visually attractive barrier that combines an independently tested safety performance with architectural flexibility to enhance the appearance of the whole structure.

Whilst most of the car park perimeter was protected by Brisafe barriers, areas that did not provide convenient structural columns were protected by Berry Beam barriers that are floor mounted on RB1 Spring Steel Buffers.

Specification

- Berry Brisafe Wire Rope Edge Protection
- Full Mesh Panel Infills
- Pedestrian Handrail and Mesh
- RB1 Spring Steel Buffers
- Flexi-Post Spring Steel Buffers
- Berry Beam Barrier Profile
- Armco Barrier Profile
