Morrisons, Bridgwater

The new Morrisons' Regional Distribution Centre at Bridgwater in Somerset covers nearly 60 acres and provides over 71,000 square metres of warehousing (over 750,000 square foot) to distribute Morrisons' goods to their stores located in the West and South West of England and South Wales.

DLA Architecture specified over 2.5km of safety barriers from us to protect personnel, plant and equipment throughout the site. This specification not only met the approval of the client Morrisons, but also with main contractor, Bowmer & Kirkland for this project.

Just over 1.5km of barrier has been installed inside the warehouse and nearly 1km outside. This included nearly 800m of Berry's Spring Steel Buffers on which a Warehouse Rail is mounted below a standard barrier rail to provide protection to pedestrian walkways from forklift trucks and other warehouse vehicles. The additional lower rail prevents the forks penetrating into the walkway below the standard barrier.

The varying styles specified reflect the different risks identified in specific areas and illustrates how our range can accommodate varying requirements and still remain an approved and tested solution.

Specification

- Barrier Rail
- Flexi-Post
- Integral Handrail
- Site-Cop Plus
- Warehouse Rail
- Self Closing Gates
- Ball Type Double Height
- Handrail
- SlowStop Bollards
- Door Guards
