Westfield Broadway

The Broadway is a shopping and leisure complex located in Bradford, West Yorkshire that is home to both high street and luxury brand outlets.

Built in 2015 by the Westfield Corporation, it houses over 1,000 car parking spaces for customers to visit the complex with ease. Because of this, sufficient car park protection was required to create a safe parking facility. Berry Systems delivered an effective vehicle restraint system solution to ensure the site was compliant and met legislation. For this project a spring post system was utilised as it has a single anchor fixing and a small footprint so it doesn't encroach into the parking bay.

This was of great benefit to the client as we were still able to deliver superior protection, without affecting the amount of car park spaces required. We also paired the spring post system with handrail and mesh to increase the level of protection for pedestrians. Additional items, such as our height restrictors and wheel guides, were installed from our industrial range to help reduce speed and prevent unwanted access to site.

Specification

- RB1 (76 X 12) Posts RB1 (100 X 14) Posts
- Handrail and Mesh for Pedestrian Protection - BS EN 6180 Compliant
- Rubber D Section
- Height Restrictors
