

Westfield, Stratford

**LOCATION:**

Stratford, London

CONTRACTOR:

Secure Parking

SECTOR:

Private

INDUSTRY SECTOR:

Vehicle Restraint Systems

SYNOPSIS:

Vehicle and pedestrian safety barriers for edge protection on perimeters, ramps and other areas in three multi-storey car parks at new shopping mall adjacent to the London Olympic Park.

PRODUCTS INSTALLED:

- Berry Beam Barrier
- RB1X Spring Steel Buffers
- GH Spring Steel Buffers
- Pedestrian Handrail
- Integral Anti-Climb Mesh

Head office:
Berry Systems t/a Hill & Smith Ltd
Springvale Business & Industrial Park
Bilston, Wolverhampton

Westfield, Stratford

We installed one of our largest ever car park safety barriers projects at Westfield Stratford City with over 7 kilometres of Berry Beam barrier, all mounted on our impact absorbing spring steel buffers.

The £1.5bn Westfield Stratford City complex covers an area of 1.9 square miles and houses 300 retail outlets, 70 food outlets, 3 hotels, multiplex cinema, bowling alley and casino. It also has 5,000 parking spaces across 1 adjacent and 2 integral multi-storey car parks.

The safety barriers were very carefully specified by architects: Buchan Group International. The car park structures are metal framed with concrete decks with an exterior expanded metal mesh surround and cladding. All floors have our Berry safety beams mounted on RB1X and GH spring steel buffers to provide full perimeter protection meeting BS EN 1991-1-1 and BS 6180 standards.

All the ramps in the two overground car parks have curved Berry Beam barriers to match the varying radius of the ramps. On tighter bends and at ramp exits, chevron signs have been mounted directly to the barriers. All ramp returns and split level areas are protected by our barriers, again mounted on RB1X buffers with handrail extensions and anti-climb mesh.

Specification

- Berry Beam Barrier
- RB1X Spring Steel Buffers
- Pedestrian Handrail
- GH Spring Steel Buffers
- Integral Anti-Climb Mesh
