

UKCA Certificate of Conformity of the Factory Production Control

This is to certify that:

Berry Systems
Springvale Business & Industrial Park
Bilston
WV14 0QL
United Kingdom

Holds Certificate Number:

0086 CPR 709720

In respect of:

BS EN 1090-1:2009+A1:2011 - Execution of steel structures and aluminium structures, The design, manufacture (including welding) and installation of structural work in steel up to and including Execution Class 2 (EXC 2) as defined in BS EN 1090-2.

In compliance with the Regulation (UK) Statutory Instrument 2019 No 465 of the United Kingdom Parliament (Construction Products (Amendment etc.) (EU Exit) Regulations or CPR), this certificate applies to the above construction product. This certificate attests that all the provisions concerning the assessment and verification of constancy of performance described in Annex ZA of the above standard(s) under system 2+ are applied and that the product fulfils (products fulfil) all the prescribed requirements set out above. This certificate remains valid as long as the test methods and/or factory production control requirements included in the designated standard(s), used to assess the performance of the declared essential characteristics, do not change and the product(s), and the manufacturing conditions in the plant(s) are not modified significantly.

For and on behalf of BSI, an Approved Body for the above Regulation
(Approved Body Number 0086):

Frank Lee, Product Certification Technical and Compliance Director

First Issued: 2019-08-05

Effective Date: 2021-01-01

Latest Issue: 2020-12-03

...making excellence a habit.™

Quality Management Policy

The quality of our product and customer service is fundamental to the success and growth of Berry Systems. Our primary aim is to provide innovative product along with installation services which together, help ensure the safety of people and the protection of vehicles, plant and property.

Berry Systems have developed and implemented a Quality Management System (QMS) in order to underpin our values, define the company's best business practices, better satisfy the requirements and expectations of our customers and to improve the overall management of the company.

It is our policy that our systems fully satisfy the requirements of the International Standard ISO 9001:2015 and addresses the:

The design, supply and installation of both pedestrian and vehicle restraint systems for off highway applications and façade systems for multi storey car parks

- The design, supply and installation of steel frame multi storey car parks
- The performance testing of existing VRS, anchors and condition surveys with recommendations for the refurbishment of multi storey car park structure
- The refurbishment of Multi storey car park structures
- The design, supply and install of VRS products including fences and bollards
- The design, supply and install of perimeter security fencing to CPNI standards
- The design, supply and installation of Facades for MSCP's and commercial buildings

The QMS outlines the overall company approach, delineates authorities, inter-relationships and responsibilities. The QMS also provides procedures or references for all activities associated with the compliance to the International Quality Management Standard.

The QMS is also used to demonstrate our commitment to ensuring the company's product offering is synonymous with compliant, safe, innovative and reliable systems. It may also be used to familiarise interested parties, organisations or authorities, with the controls that have been implemented, to give assurances that the integrity of our quality system is maintained and focused on customer satisfaction whilst promoting on-going continual improvement.

These policy commitments will be translated into actions by using quantifiable objectives, targets and key performance indicators and will be reviewed for continuing suitability by senior management.
