About Berry Systems

Providing complete packages for building exteriors, we offer an extensive range of cladding and façade choices in a breadth of materials, finishes and effects.

With an extensive product range of cladding and façade options - and available in various finishes including polyester powder coated, polished and anodised - Berry Systems' industry leading knowledge and experience delivers a turnkey package for building exteriors that meets the most stringent design and building regulations and works to specific requirements.

Offering the widest and most varied range of solutions in the industry from rainscreen including traditional aluminium, ceramic and terracotta designs or a lightweight, perforated, composite and timber cladding to green walls, fins and

louvres, mesh, trapezoidal profiles and bespoke designs, Berry Systems works with clients to deliver cladding and façade projects that elevate external appearances whilst protecting people, property and assets.

Cladding Products

Our cladding products include:

- Rainscreen including traditional panel designs or a lightweight glass alternative, all adhering to the latest industry standards.
- Composite used for full or partial weatherboard cladding and where site boundaries require fire resistance.
- Perforated including a range of flexible designs creating imagery, 3D and shading whilst managing the ingress of natural light.
- Timber providing one of the most durable and lasting cladding solutions whilst also naturalising building aesthetics.
- Green Areas including walls, roofs and trellis systems available in various configurations, achieving a natural appearance whilst lowering inside ambient temperature.
- Fins and Louvres installed either vertically, horizontally, inclined or twisted and available in a range of materials to provide shade and maximise air flow.
- Mesh available in expanded or woven stainless and galvanised steel and in a vast range of designs to enable natural ventilation and achieve a visually open aesthetic.
- Trapezoidal Profiles including horizontal or vertical mounts comprising multiple corrugations and available in a wide range of colours and finishes.
- Bespoke Designs offering special finishes or unique patterns driven by architectural requirements.

CLADDING BENEFITS

Extensive Range

Including a variety of materials, colours and finishes

Industry Leading Expertise

Providing a comprehensive turnkey service

Unrivalled Quality

To meet design specifications and environmental requirements

Fully Compliant

With unrivalled safety standards

Industry Pedigree

Spanning 50+ years of business

Cladding Benefits

Design Flexibility – qualified and experienced, in-house design and survey teams using the very latest CAD software offering extensive range of finishes with the ability to either deliver to already pre- approved design specifications or to work from initial concept to deliver bespoke architect inspired thinking.

Full Turn-key solution – expert project team managing project life-cycle and offering a market leading turnkey service from initial concept and design creation to full installation and ongoing maintenance, managing clients' expectations and ensuring projects are delivered safely, on time, to a high quality and with zero defects.

Superior Quality providing the very highest standards of materials that meet pre-determined legislative standards whilst also meeting the design and visual requirements of a client brief.

Conforming to latest standards - with all cladding and façade products accredited and certified to the internationally recognised standards, meeting A1 or A2-s1-d0 fire rating and adhering to regulatory requirements. Berry Systems also prides itself on only using timber sourced from FSC accredited suppliers certified to all mandatory industry regulations.

Berry Systems provides full project delivery including:

Early Involvement and pre-engineering to ensure successful project delivery

Design and Engineering using the very latest CAD based software technology

Supply of fully certified systems, BBA and CWCT compliant, A1, or A2-s1-d0 fire rated and meeting all latest building regulation requirements

Installation and Site Works by accredited and experienced installers

Project Management providing a full turnkey solution, managing the project life cycle.

Berry Systems offers an extensive range of cladding solutions for both retrofit and new build projects. Please contact the sales team to discuss your requirements.

World Class Solutions Provider

A world class engineering solutions provider, Berry Systems is the market leader in the design, engineering, supply and construction of a wide portfolio of products offering eight core service streams.
