# Redrock, Stockport

Redrock is a new leisure facility located in the centre of Stockport which has a 360 space multi-storey car park.

Popular restaurants and a cinema now feature in the location to help provide locals with a safe, secure and modern leisure facility where they can relax. Berry Systems were keen to get involved in such a project and help contribute to the development ongoing in the area. Using our expertise of the car parking industry, we designed, manufactured and installed a system that met their requirements exactly.

The RHS (Rectangular Hollow Section) System we specified on the project was made bespoke and suited more to their aesthetic needs. We combined the vehicle restraint systems with handrail and mesh to provide additional pedestrian protection. Cladding rails were also created and supplied to support the exterior cladding that was specified on the project. Throughout this project, our client took advantage of our consultancy services to work together to create a solution that was compliant, safe, stylish and satisfied both parties.

## Specification

- BRB1X (100 X 14) Posts
- Handrail and Mesh for Pedestrian Protection
- Handrail and Mesh - BS EN 6180 Compliant
- Orsogrill Infill Panels to Split Level
