RUBBER COLUMN PROTECTOR

Rubber Column Protection Units (RCPU) effectively absorb and disperse impact forces, protecting both columns and vehicles from damage during collision.

CAR PARK STRUCTURES | WAREHOUSES | INDUSTRIAL UNITS

01

VERSATILE

Suitable for various environments, such as car parks, warehouses, industrial facilities, providing versatile protection for structural columns.

02

SAFE AND DURABLE

Provides protection to the structure from vehicle and warehouse material handling equipment and help mitigate potential damage, enhancing safety and preserving the integrity of the building structure. Constructed from durable rubber materials, ensuring a long lifespan and continued effectiveness in preventing damage.

03

COST EFFECTIVE

Easy installation minimises site disruption and installation cost. Helps reduce maintenance and repair costs associated with column damage caused by vehicle impacts.

SHIELDING SPACES SAFELY

PROTECTS STRUCTURE FROM IMPACT

Create a physical barrier by preventing accidental vehicle intrusion into structure. These buffers are more often employed in parking, industrial, warehousing, construction, and other environments to enhance asset and structure protection and safety.

BENEFITS OF RCPUs

- IMPACT ABSORPTION VERSTATIVE AND
- EASY INSTALLATION DURABLE AND COST
- EFFECTIVE VISUAL WARNING FOR DRIVERES,
- REDUCES LIKELIHOOD OF ACCIDENTAL COLLISIONS
- LOW MAINTENANCE AND REPLACEMENT COST
